

Research Study

UTD THE UNIVERSITY OF TEXAS AT DALLAS
School of Behavioral and Brain Sciences

Wanted: Caregivers & their children ages 12-42 months old that have difficulties with social attention and communication, or are suspected of or diagnosed with ASD.

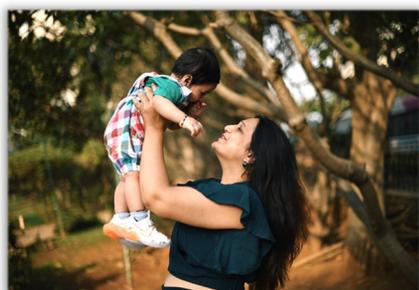

Purpose of Study: The UTD Social Communication Lab is investigating the effectiveness of a Pathways parent coaching intervention compared to a parent education intervention on improving social, communication and language skills in young children.

Time Commitment: The study provides 24 weeks of intervention, with assessments to measure your child's progress every 12 weeks at one of the two UTD Callier Center locations (Dallas or Richardson). Total time commitment is 36 weeks from time of first intervention visit.

Receive Intervention: Families assigned to the Pathways intervention group will receive in-home coaching sessions. Families assigned to Parent education intervention group will receive a combination of educational video lessons and teleconference sessions.
