

"Our care team really listens to our questions and concerns about our son. They put his needs first. I feel we are on the same team in doing what is best for my son."

"We cannot be more happy and amazed at the progress our little one has made. I was very hesitant to start with the fear of it being overwhelming, but it has been just the opposite."

Life-Changing Behavioral Health Care

Give your child the best support: Collaborative, personalized care to help them learn, grow and reach new milestones.

Together, We'll Get There

Elemy transforms the lives of children and families through individualized, technology-enabled health care.

+ Behavioral Health Evaluations

Our clinical experts review your child's history, assess skills, and recommend a personalized care plan that's covered by insurance.

+ Autism Care

Our approach to autism care uses activity or play-based interactions. We deliver ABA therapy directly in the home, where the child is most comfortable and likely to respond to care.

+ Online Therapy

Our live, online therapy sessions will support your child through life challenges using tools that address their individual needs and empower them to achieve new milestones.

+ Medication Management

Our clinical psychiatric experts are extensively trained in different medication protocols and will find the best treatment path for your child if medication is needed.

Why We're Different

We're here to help your family navigate the ups and downs and reach new milestones.

+ Personalized Care

We develop a care plan that's personalized for your child's unique needs and delivered either in-home or online

+ Proven Results

On average, in the first 6 months, children see an 80% improvement in behaviors and an 88% growth in new skills

+ World-Class Clinicians

Our expert advisors and clinicians have advanced training in child behavioral therapies for autism, ADHD, anxiety, and more.

100+ Insurance Plans Accepted

How It Works

Every child is different. And so is every care journey. But our process is always consistent.

STEP 1

Getting to Know Your Child

We spend time understanding your child's history and concerns. Your care team reviews this before you first meet, so no time is wasted.

STEP 2

Evaluation and Diagnosis

If your child does not yet have a diagnosis, our psychiatric experts will perform an extensive evaluation to make an accurate diagnosis.

STEP 3

Starting the Care Journey

If your child needs therapy, medication, or both, our clinical experts will build a personalized, at-home care plan tailored to your child's unique needs.
